

Medication and Drug Overdose in Macon County

Technical Notes

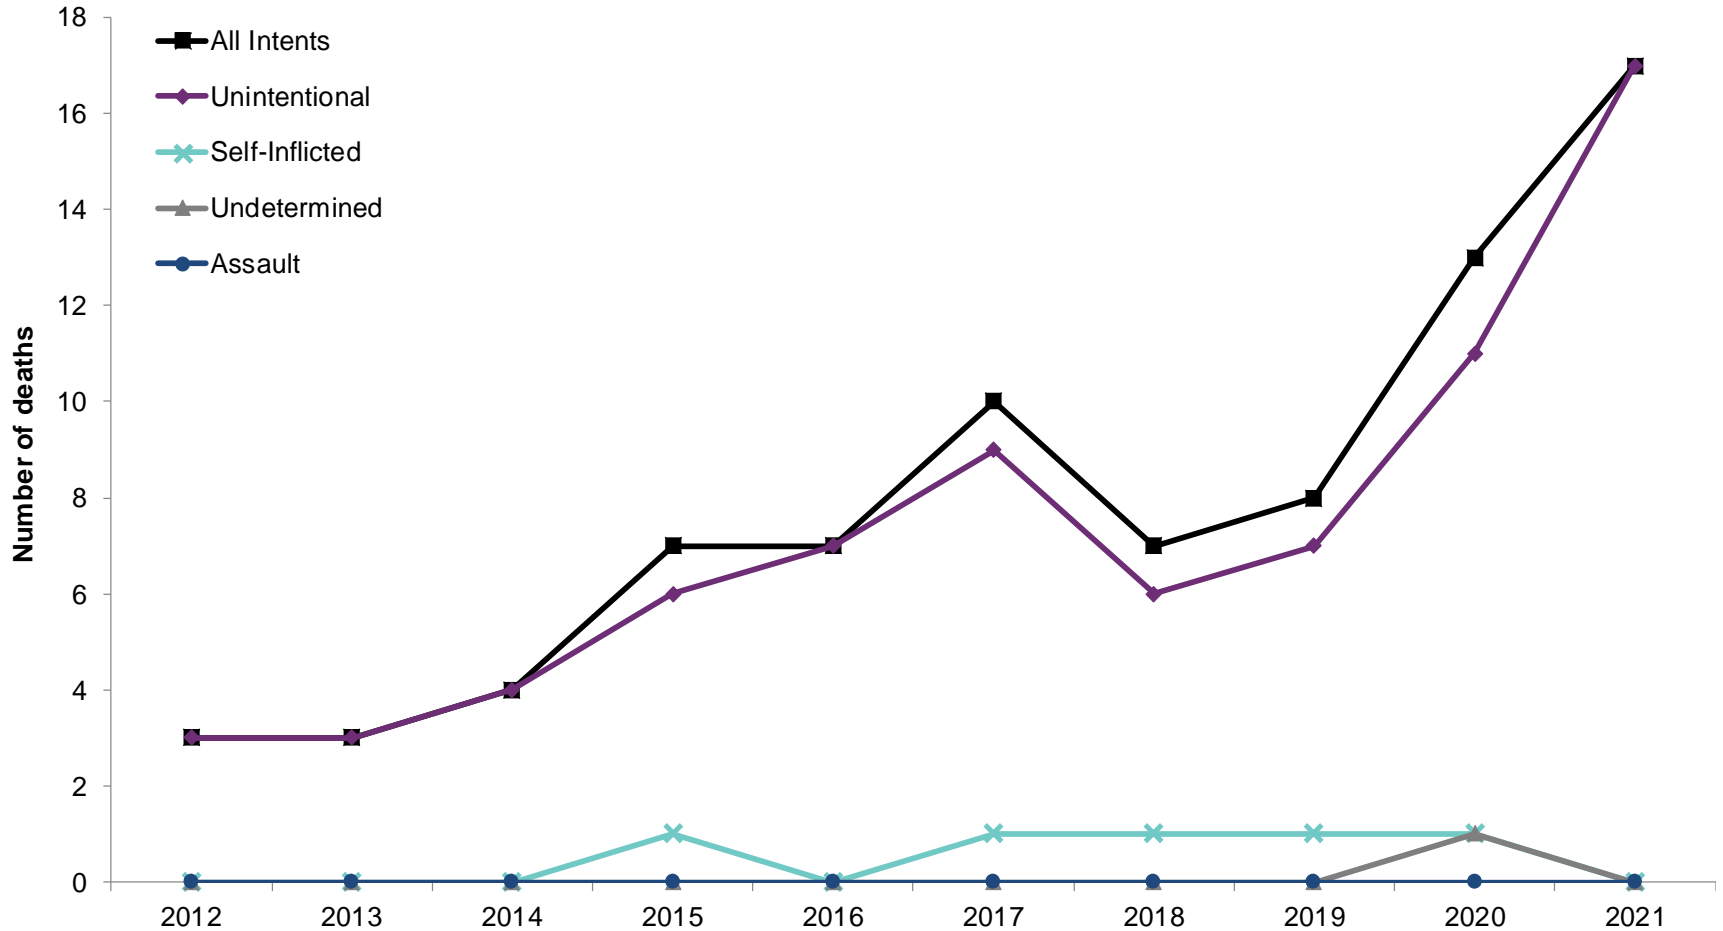

- The fatality data provided here are part of the Vital Registry System of the State Center for Health Statistics (SCHS) and have been used to track and monitor the drug overdose burden in NC using ICD-10 codes. Surveillance using ICD-10 codes relies on the immense efforts of the NC Office of the Chief Medical Examiner (OCME) to investigate overdose deaths in NC.
- Individual ICD-10 codes do not exist for each specific substance involved in overdose. Other Synthetic Narcotics (T40.4) includes several substances but the majority of deaths with this code involved fentanyl. Similarly, psychostimulants with abuse potential (T43.6) is used for methamphetamine surveillance.
- Counts and rates are limited to NC residents. When calculating rates, higher counts provide greater reliability, therefore years are often grouped. Use caution when interpreting rates for counts from 5 - 9. Counts from 1 - 4 are considered unstable and therefore have a low reliability; rates are not calculated for these counts.
- Population estimates for 2021 are subject to change.
- Speaking and technical notes should be read prior to using.

One Year's Estimated Total Lifetime Costs

Medical* and Statistical Life** Loss from Medication & Drug Overdose Deaths, 2021

	Macon County	Statewide
Total Medical Costs*	\$131,586	\$24,535,913
Total Statistical Life** Loss	\$191,383,969	\$35,304,800,000
Combined Costs	\$191,515,555	\$35,325,130,000
Cost per capita	\$5,321	\$3,332

Technical Note: These estimates only include fatalities and do not include additional costs associated with non-fatal overdoses, treatment, recovery, and other costs associated with this epidemic.

*Medical costs refer to medical care associated with the fatal event, including health care and lost productivity.

**Value of statistical life refers to the estimated monetized quality of life lost and assesses underlying impacts on life lost.
